Programmer | Scientist | Artist

SUMMARY

Driven by challenge and curiosity, I combine an artist's creativity with a scientist's logic approach to solve problems. Complex systems interest me. I'm passionate about improving testing methods to support Test-Driven Development (TDD) and implementing better architecture through Domain Driven Design (DDD). As a leader, I focus on my teammates' growth and removing bottlenecks from their work; a well-oiled team achieves more than I can do alone.

EXPERIENCE

RF-SMART

Senior Software Developer	**Dec 2023 - Present**
Software Developer II	**Jan 2023 - Nov 2023**
Software Developer I	**Jan 2022 - Dec 2022**

Leading the outbound products development team. Developed complex products for the Netsuite ERP using Suitescript within an agile framework. Mentored 5 new developers. Built an integration testing framework to run code in a 3rd party environment. Organizing and leading Dev Bookclub. Known as the go-to resource for unit and integration testing. Regularly writing documentation for design decisions, tribal knowledge, and new workflow processes I am designing and testing with my team.

TrustiPhi, LLC

Programming Consultant	**Aug 2020 - Jan 2022**

Redesigned their flagship product's frontend. Introduced unit testing to the product. Expanded the API gateway. Created diagrams and graphics of product behavior for marketing presentations.
